

World Class Automated systems providing sorting, weighing, classifying and storage. Loading of washers with soiled work. Processing of clean finished goods to the finishing equipment.

These systems have also found wide acceptance in the Textile Industry, including installations at Hosiery, Carpet, and Blanket plant locations.

FLM'S FULLY AUTOMATED LOADING SYSTEM

FLM'S MANUAL WEIGHTING HOISTS

Every FLM soil or clean monorail system will:

- Reduce your labor costs.
- Increase your plant productivity.
- Pay for itself in a short period of time.
- Add levels of automation to the over all plant operation.
- Provide built in ergonomic designs to help reduce costly employee injuries.
- Allow you to maximize the use of vital floor space.
- Grow with your business; ease of expansion to existing systems.
- Organize the plant's daily production.
- Deliver the goods throughout the plant at the time that the goods are needed. Soil goods to the washer and clean goods to the finishing equipment.
- Allow you to view and identify customer's goods within the system in real time.
- Encompass a modular design with accessible maintenance to most components.
- Supply free technical support for the life of the system.
- Provide a system design with ease of installation in mind.

MONORAIL SYSTEMS

STORAGE SYSTEM ABOVE THE WASHER

Placing the storage rack above the washer reduces the time necessary to replenish the washer buffer. **FLM** tries to store the linen as close to the washer as possible, this way the bag has less of a distance to travel to the washer when the load is needed.

LOADING THE WASHER WITH A SEAMLESS TRANSITION OF WASH CODES

FLM monorail systems deliver the correct goods to the washer at the correct time every time.

Every **FLM** monorail system is custom built to fit the customer's specific needs. At **FLM**, one size does not fit all. Our monorail systems are designed with the customer's requirements along with the facility restrictions in mind.

FLM offers a full line of soil and clean material handling systems for any size operation.
