

Fairfield Laundry Machinery proudly introduces the DT-1000 Lint Collector. This unit is designed for smaller, on premises laundries in the hotel, motel, health care and dry cleaning industries.

The **DT-1000** model is an inexpensive Lint Collector that includes the best features found in the larger "Dry Type" Lint Collectors. The Lint Collector is easy to install and ready for use.

The **DT-1000** eliminates the time consuming task of cleaning multiple dryer screens, by combining the lint collection process into (1) central location.

### **The DT-100 or 1000 Lint Collector features:**

- Stainless steel welded construction
- Custom built to suit your location.
- Ease of installation
- Compact – minimum floor space required.
- Low noise level.
- Can be installed inside or outside.
- Large, easy to access, clean out door.
- Large capacity lint bag.
- Fire suppression capabilities
- No electricity needed
- No compressed air needed
- No water needed (except for fire suppression if required)
- Low maintenance
- No moving parts
- 1000 maximum CFM capacity.
- Inline fan available for increased CFM when needed.

# MODEL DT-1000

## "Dry Type" Lint Collector

### SPECIFICATIONS FOR FLM "DRY TYPE" LINT COLLECTOR

The Lint Collector shall be fabricated of 18 Gauge Stainless Steel Type 304.

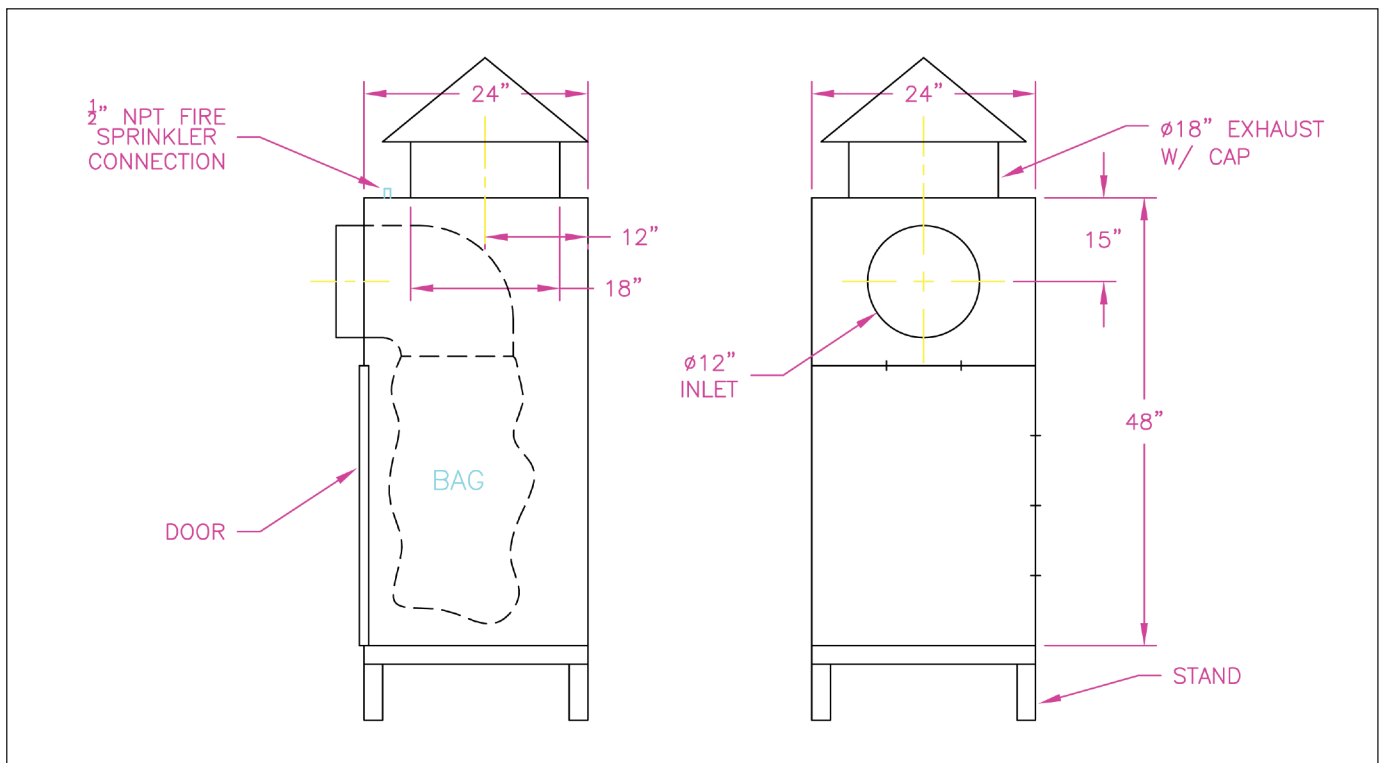

The unit is manufactured as an all welded unit.

An access door, minimum 24" by 30" shall be installed on the inlet of the main chamber to allow normal routine maintenance. The Access door shall be completely gasketed and secured with a bolted locking mechanism.

The discharge shall be designed for a top discharge location.

The unit will be rated to service 1000 CFM.

The Lint Collector legs shall be fabricated from a minimum of 2" x 2" x 3/16" angle iron primed and painted.
